Brisket - 5/18LNS - 5/20LNS

Rotisserie Chicken - 6" Polyester Poultry Loops

---

The following is a description of the numbering system that uses to size and catalog the netting we manufacture:

**5/18LNS**

"5" - Describes the amount of stitches between the elastic strands. The lower the number, the smaller and tighter the squares will be.

"24" - The number of squares that make up the circumference of the netting.

"LNS" - Abbreviation for Lock Net Stitch. Prevents the chain stitches from moving freely up and down the elastic strands. Provides even holding power and a uniform pattern on the product.

**P5/18LNS**

"P" - Indicates the product is made of polyester. If no letter is before the number, it is cotton product.

The standard for rolls are 50 yard rolls. 2 and 3 stitch netting commonly is measured in 50 meter rolls. Also is manufactured in:

- Large rolls (250, 500 and 1000 yard or meter rolls)
- Loose boxes instead of wound rolls
- 100 piece packages cut into a specific size
- Cut & clipped product
- Cut and sewn product
